I am a curious and passionate front-end developer with strong focus on React.js and Redux. I am constantly studying and looking for new tech to learn - my main goal is to become self-sufficient as a fullstack developer. Problem-solving and automation are a big motivation for me.

COMPUTER AND CREATIVE TECHNOLOGY SKILLS

Strong: HTML, CSS (LESS), JavaScript (React.js, Redux), Cypress, Git, Jira, TDD (Jest, Enzyme), Typescript
And applications such as Microsoft Excel (including VBA), Adobe Photoshop, Adobe Illustrator, AdobeInDesign, CorelDraw

Learning: Flutter, SQL, Node.js, Docker

PROFESSIONAL EXPERIENCE

FITOGRAM GBMH	<i>Full Stack Developer</i>	may 2019 - present
Led the development and deployment of new sign up process, supporting a junior developer, reviewing code and ensuring code was covered by tests. Currently learning Flutter and helping with the development of the new native app.		
MVF GLOBAL	<i>Engineer</i>	oct 2018 - may 2019
Worked closely in the hiring and onboarding of junior developers. Worked with Marketing Operations team to develop an automation tool to help with grunt tasks.		
MVF GLOBAL	<i>Junior Engineer</i>	dec 2017 - sep 2018
Initially hired to work with templating in HTML and CSS, quickly joined the ongoing task of migrating the project from jQuery to React. Focused on delivering value to all stakeholders by keeping best practices of testing and maintaining the code clean. Mainly allocated to front-end work (React and Redux), but occasionally venturing on the backend to include new features in the CMS (Laravel, SQL).		
JOHN LEWIS	<i>Buying Assistant</i>	may 2017 - nov 2017
Worked in the interior decor buying department assisting in the buying cycle. Supported daily tasks by developing numerous spreadsheets that improved efficiency and visibility of data for the team and across departments.		
MICHAL KORS	<i>Buying Assistant</i>	sep 2016 - may 2017
Worked in the buying and planning department facilitating the buying process for the apparel and shoes division in the UK and Europe. Developed multiple spreadsheets that replaced manual daily tasks, significantly reducing innaccuracy and lead time.
